*The Paul H. Baermann Seed Co.*  
504 VLIET STREET      MILWAUKEE, WIS.

# *Announcing the Opening*

OF OUR NEW STORE

At the old location (504 Vliet St.)

---

It is with considerable pride we announce the completion of our new home.

We now take occasion to express sincere appreciation to our patrons and friends for the loyal support which had made possible as well as necessary this modern store.

Improved facilities will enable us to assure our customers **GREATER SERVICE**—service that serves and conforms to the needs of the Market Gardener or Florist.

We present our ninth annual price list to the Market Gardeners and Florists.

Our many years experience in the seed business enables us to secure the best varieties from seed growers with the highest reputations for quality in this country and abroad.

We do not attempt to compete in price with inferior stocks offered by some firms under the same name, for any gardener can understand that the cost of raising a field of carefully rogued and selected seeds is greater than a field of cheaper seeds not requiring as much attention. Naturally the seed growers prices to us are a bit higher for the better stocks. You will find our prices very reasonable, however, for the quality of seed offered.

The first cost of seed is but a small item compared to the cost of land, labor, time and all other attentions a crop needs before maturity. If the crop is not as good as it should be and the seed is at fault, you can readily see that the small difference in the first cost of the seed is only a very small part of the loss sustained.

The most important factor to a gardener or florist is that the seed he has planted should GROW and it certainly would be a big aid to him to know just what PERCENTAGE grows. We test EVERY ITEM in our stock for germination before our orders are filled and we have the actual tests to show for reference at any time.

Many new varieties and improvements and selections on old strains are listed this year which every gardener ought to try and which may prove real money makers because of their earliness or other good qualities. These new varieties with only a few exceptions were tried out in field tests a year before offering them to the trade as better stocks. **NEW STOCKS AND THE BETTER VARIETIES ARE PRINTED IN HEAVIER TYPE IN THIS LIST.**

# TESTED SEEDS

---

All orders taken previous to the issuing of this list, if some of the prices are higher, will be lowered wherever possible to meet prices in this catalogue. This list cancels all previous prices.

Write all orders on blank enclosed and use envelope, writing your return address thereon. We will send all orders of reasonable weight for Garden and Flower seed by Parcel Post, the postage charges paid by us (except Beans, Sweet Corn and Peas.)

Seamless Cotton Bags charged extra at cost where required for packing or shipping.

As customary with all American seed houses we can not GUARANTEE results or crops, due to poor weather conditions, improper care at time of planting or cultivation, damage done by insect pests, and all other causes beyond our control.

NON WARRANTY—"We give no warranty express or implied as to description, quality, productiveness, or any other matter of any Seeds, Bulbs or Plants we send out and will not in any way be responsible for the crop."

Although if there is any cause for complaint, we will determine the cause and replace the seed free of charge if it is at fault.

---

## VEGETABLE SEEDS

ALL MADE UP LITHOGRAPHED PACKETS 5c. NO PACKETS LESS THAN 10c OF ANY VARIETY WEIGHED UP FROM BULK.

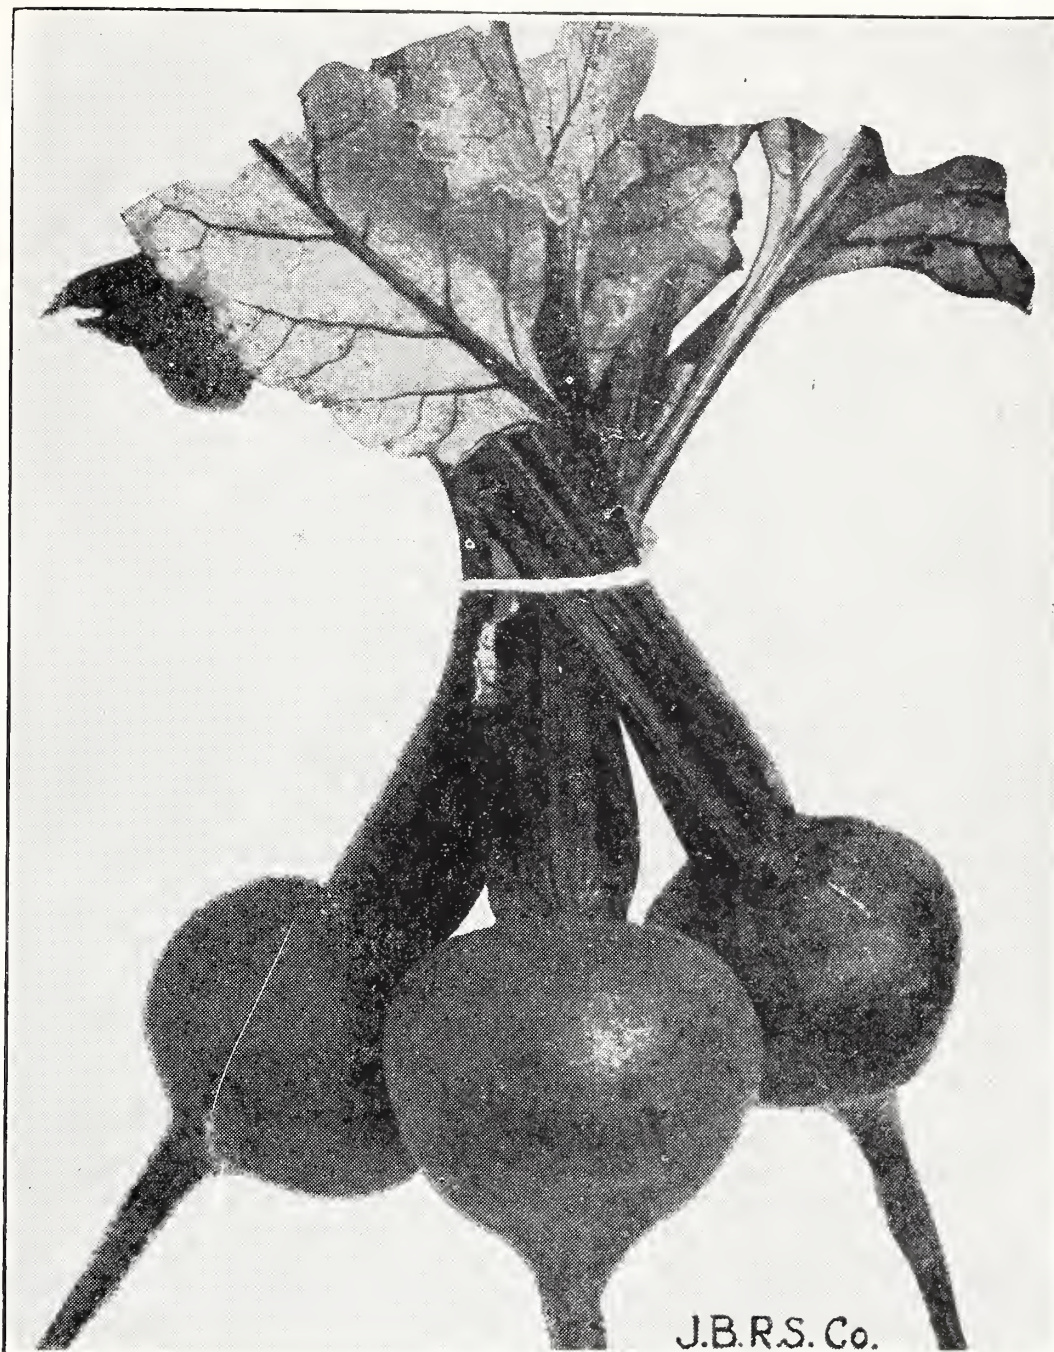

— ARTICHOKE	oz.	¼ lb.	1 lb.
Large Green Globe .....	\$0.50	\$1.60	\$6.00

### ASPARAGUS

Giant Snowtop .....	.20	.65	2.35
Mary Washington, original strain of this rust re-			
sistent variety .....	.25	.75	2.50
Palmetto .....	.10	.25	.90

Fertilizer Will Pay in the Long Run.

## SELECT FLOWER SEED

We handle the best varieties of Flower seed only, which are true to name and of highest germination. Our seed is grown for us by experts in this line both in this country and abroad.

**Note**—Flower Seed in this list will be marked as follows:

- Perennials—(P.)
- Biennials—(B.)
- Greenhouse Plants—(G.)
- Climbers—(C.)
- Annuals will not be marked.

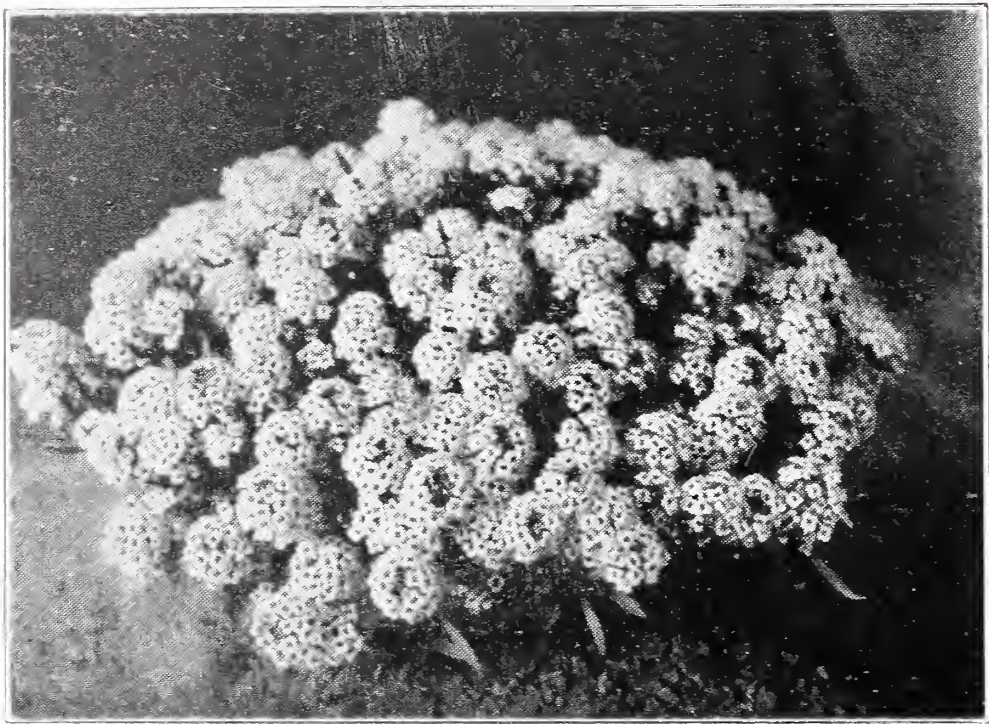

All Lithographed made up packets 5c. NO FLOWER SEED WEIGHED UP FROM BULK LESS THAN 10c.

### IMPORTANT!

We have discontinued Trade Packets on practically all varieties and listing smaller weights instead. We believe this will be better and less confusing to the customer. **Please order by weight wherever possible**, from 1/256 part of an ounce (for the very high priced seed) and up, even if smaller weights are not listed in this book.

### NEW EARLY FLOWERING SPENCER

#### SWEET PEAS

##### New Early Flowering Spencer—(G.)

We have a very superior stock of this most important item for the florist. We buy only the carefully selected strains from the best growers of Sweet Peas who has repeatedly won Gold Medals or other high honors in the National Flower Shows. Many varieties listed under the "old reliable" names are in reality new improved stocks carefully selected.

SWEET PEAS—Cont'd.

TRY THESE NEW NOVELTIES

It is the Florist who tries these new novelties in new colors who makes the "hit" and also the most money on the wholesale or retail Flower markets.

## TESTED FLOWER SEEDS

### GIANT DOUBLE DAHLIA FLOWERED ZINNIAS

This new type of Zinnia should not be confused with the inferior and low priced imported seed offered by some seed houses under same name. Our seed is procured from the California originator of this new type.

A new improvement on all types of Zinnias, which can best be described by saying they resemble Dahlias. Every florist and gardener should try this new type which we offer in the following colors:

	$\frac{1}{16}$ oz.	$\frac{1}{4}$ oz.	1 oz.
Polar Bear—white .....	.20	.75	2.50

Ask for Complete Catalogue  
and Prices

# Planet Jr. Garden Tools

## No. 26 DRILL SEEDER

Satisfactory for any type of soil, particularly muck. The Planet Jr. No. 26 Drill Seeder has a capacity of four quarts. Extra substantial, wide tread wheels, front and rear make it easier running. The wide tread wheels are particularly important on light, spongy, muck soils and in sandy soils. The feed is sure without breaking seeds. Seed opening is changed in an instant by a brass seed cut-off which has no links or connections, no lost motion. Stays where you put it. Detachable hopper—convenient for emptying seed. Seed shut-off: Operates independently of the index setting. Marker adjustable to 20-inch rows; has double points, makes clear marks. Handles adjustable. Opening plow constructed to prevent wind blowing seed away.

## No. 3 HILL AND DRILL SEEDER

Capacity three quarts. Sows in straight drills or drops in hills, 4, 6, 8, 12 or 24 inches apart. Thousands of them used by market gardeners everywhere, for many years, with complete satisfaction.

## No. 220 FERTILIZER DISTRIBUTOR

NEW. Hopper capacity one bushel. Weight of load placed over wheel, making it easy to push. The No. 220 will distribute 100 to 2000 pounds of commercial fertilizer to the acre. Quantity per acre regulated by notched index on right hand handle. Shut-off rod regulated from same point. The six galvanized spouts are easily and quickly adjusted. The feed is positive. No chains, gears, or belts to break, rust, tear or stick. Distributes fertilizer in the middles of three rows 12 to 14 inches apart; side-dresses one side each of two rows up to 36 inches apart. Can be used in rows as narrow as 9 inches. Any of the spouts can be shut-off completely when desired. Has 24 inch drive wheel.

## No. 11 DOUBLE AND SINGLE WHEEL HOE

The No. 11 is a very complete cultivating tool for the market gardener or the home gardener. Equipment consists of: Pair 4½-inch hoes, pair 6-inch hoes, four steel cultivator teeth, pair plows, two pairs of rakes, pair of leaf lifters. Handles adjustable. Cultivates both sides of the row at one time by straddling, until plants are 20 inches high. All cultivating attachments are oil tempered, specially hardened.

## No. 13 DOUBLE AND SINGLE WHEEL HOE

Same as No. 11 except equipment includes only one pair 6-inch hoes, the most useful cultivating attachments and all that are needed by some market gardeners. Any of the above attachments can be added at any time.

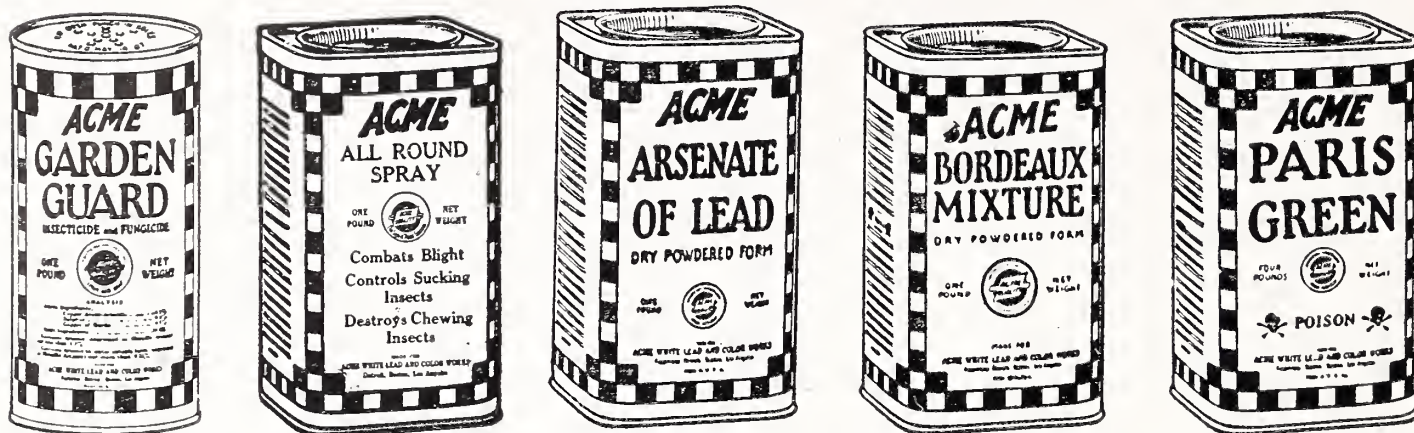

## No. 18 SINGLE WHEEL HOE

An economical, light running tool for the market gardener, equipped with one pair of 6-inch hoes. These 6-inch hoes are wonderful weed killers, cultivating thoroughly and at the same time producing a mulch to preserve moisture. Other hoes, cultivator teeth, plows, rakes, etc., may be added whenever desired.

NOTE: We carry in stock most attachments and replacement parts for Planet Jr. tools. For complete information about the Planet Jr. line, ask for a complete 72-page catalog and prices.

gots on all root crops.

Radish, turnip, Cauliflower,  
Cabbage, etc., in Hot Bed or  
Field.

5 lbs. 75c, 25 lbs. \$2.50, 100 lbs. \$8.50.

# Armour's Big Crop Fertilizers

## Armour's Big Crop Bone Meal—2-29—125 lbs. in a bag

Guaranteed analysis 2% ammonia, and 27% total phosphoric acid. Very good for fall application on lawns, meadows and permanent pastures, also valuable in greenhouses for benching, rose beds, pot and bench plants. It is finely ground and of first quality. Decomposition starts quickly and continues throughout the growing season, improving soil fertility as well as feeding the plants.

Apply 25 lbs. per 1,000 square feet on lawns, 50 lbs. per cubic yard for benching pot plants and roses, 500 to 1,000 lbs. per acre.

## Armour's Big Crop 6-12-9

For all soils other than muck or peat. It is especially prepared for crops requiring a quick acting, strong fertilizer, and must be well mixed into the earth. Especially adapted to truck farms, home gardens, potting earth and top dressing. Good for asparagus, beans, beets, peas, cabbage, cucumbers, melons, onions, potatoes, etc.—also fine for strawberry beds.

For truck crops apply 600 to 1,200 lbs. per acre—Potting earth, mix 1 part to 50 of soil, and top dress at the rate of 15 lbs. per 1,000 square feet.

## Armour's Big Crop 4-16-8

An excellent formula for wheat, corn, oats, sugar beets, etc., on soils deficient in available potash, and on lands where clovers, alfalfa and soy beans have been grown in rotation. Application—125 to 250 lbs. per acre when applied at time of seeding, and 250 to 500 lbs. per acre broadcast.

## Armour's Big Crop 0-9-27

An excellent composition for high lime

muck, peat, and alkali soils. Potatoes and onions respond readily to applications of this fertilizer. Also good for celery, carrots and other crops raised on this type of soil. Apply at the rate of 400 to 800 lbs. per acre.

## Armour's Big Crop 0-14-14

On all muck and peat soils which contain enough nitrogen but lack in phosphate and potash. Very good for all root crops—radish, beet, carrot, potatoes, etc., also celery and asparagus. Apply 400 to 800 pounds per acre.

## Armour's Big Crop 20% Super-phosphate

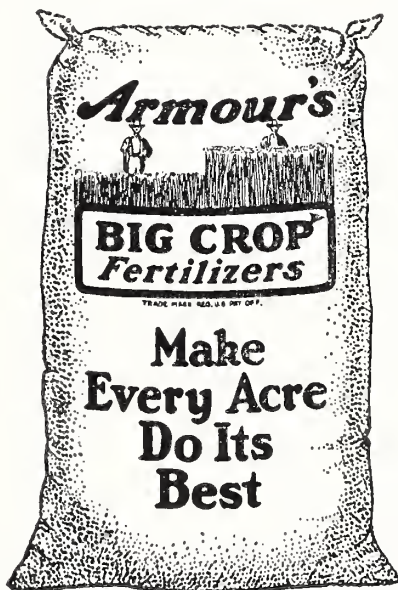

Phosphorus in the most available form. Should be used in connection with manure—an application of 50 to 75 lbs. per ton of manure gives very profitable results. Used on all grain crops and others needing excessive amounts of available phosphorus, especially clover, alfalfa and other legume crops. When applied on hay crops, use 200 to 400 lbs. per acre—on small grains, use 125 to 200 lbs. per acre in hill or row, and 500 lbs. per acre when broadcast.

## Armour's Nitrate of Soda

Most available and the quickest commercial nitrogen used to force leaf growth of vegetables and flowers. It should be applied only when the plants are above ground.

## Armour's Muriate of Potash

Imported or domestic Muriate, recommended for all root crops. May be used with Bone Meal and Dried Blood or natural fertilizer—for fruits, celery, asparagus, etc.

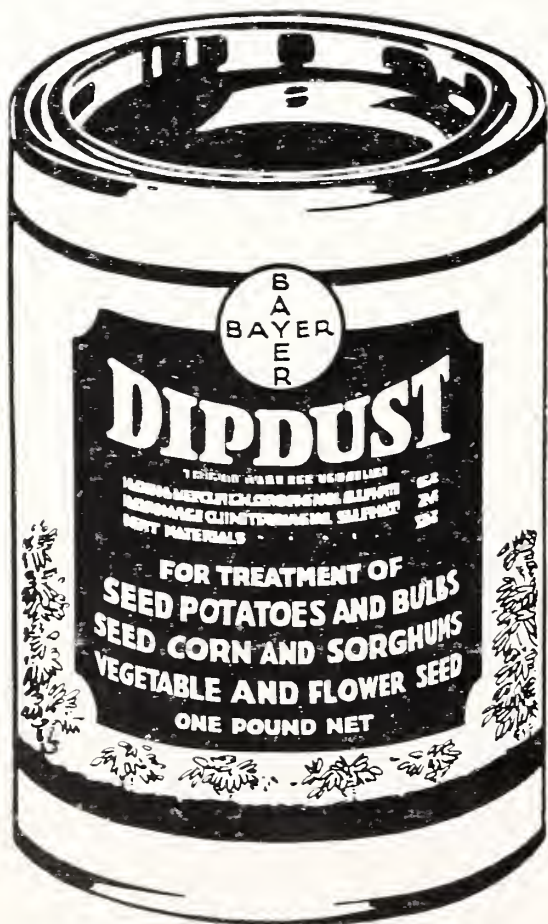

**MAKE EVERY ACRE DO IT'S BEST!**

# BAYER SEED TREATMENT

## *Increases Growing Profits!*

Seeds, like humans, are susceptible to disease. You cannot always see disease, but you can see the results in poor germination, weak, spindly plants and low yields of poor quality crops. Disinfecting your potato, corn, vegetable and flower seed with BAYER DIPDUST before planting helps to prevent the destructive diseases that cost growers millions of dollars annually. BAYER DIPDUST is easily and quickly applied and inexpensive to use.

**For Potatoes, Flower Bulbs and Roots** highly effective against seed borne scab, rhizoctonia and black-leg of potatoes—and protects bulbs and roots against many rots. Simply dip the pieces to be treated in a mixture of Dipdust (in the proportion of 1 pound Dipdust to 2½ gallons of water) for a moment. Then dry and plant or store for future planting. No more two hour soaking with old-fashioned treatments is required. Dipdust is not only much more quickly applied but is more effective. Will not injure cut seed pieces. One pound treats 15 bushels of potatoes or its equivalent of bulbs and roots.

### **For Field and Sweet Corn.**

Permits earlier planting and tends to reduce seed decay, increases germination, prevents seedling blight, root and stalk rots and increases the yield. Simply dust the seed with Dipdust by placing the seed in a jar, milk can, iron drum, or barrel shaped churn. Add Dipdust at the rate of 3 oz. to a bushel of seed. Cover container tightly and shake, roll or rotate for about three minutes—and the seeds are all ready to plant—or store for future planting. One pound treats 6 bushels of seed.

### **For Vegetables and Flowers.**

An effective aid in controlling damping-off of seedlings, and certain root and stem rots. Use a dust treatment following same directions as for corn. One level teaspoonful of Dipdust treats 1 quart of seeds. One pound treats 6 to 8 bushels.
